

● AHA foaming cleanser aminopeeling

aminopeeling is a facial cleanser that supports the ability to gently peel off the old keratin that accumulates on the skin surface, with the power of an acid that is less irritating to the skin, to make it the natural beauty of the skin. Simply use one pushed foam as a daily cleanser or body soap, it will lead to smooth skin like a baby with no dullness※.

※ dullness is from old keratin

aminopeeling contains four types of peeling ingredients including less irritating glycolic acid to Oriental people's skin. It also contains amino acid-based cleansing agent and glycyrrhizic acid as a skin care ingredient.

※ There are individual differences in skin.

If you feel a strong stimulus please adjust the number of uses.

Normal turnover is important for beautiful skin

When new cells are born in the basal layer, the old horny layer will be peeled off and reborn into new skin so that it can be pushed up in order from the bottom. **Turnover** is repeated at about 28 day cycle.

aminopeeling helps keep the turnover cycle normal in order to maintain beautiful skin.

Normal turnover

How to use

After moisturizing the face, take an appropriate amount (1-2 pushes) on the palm of your hand and apply the face softly avoiding eyes. Rinse with water and then moisturising with lotion or essence
